On the occasion of the Carbon Forum America 2008 Conference, the Coalition for Emission Reduction Projects (CERP) invites you to a briefing session on the Coalition's work to ensure that U.S. climate change legislation and programs have workable provisions for offsets.

Hear from representatives of:

- EcoSecurities
- Deutsche Bank
- Stark Investments
- Van Ness Feldman

The mission of the Coalition for Emission Reduction Projects (CERP) is to educate policy-makers and the general public about the benefits of using offset allowances from domestic and international greenhouse gas (GHG) emission reduction projects as a means for regulated entities to meet their compliance obligations under a U.S. federal GHG regulatory program.

For more information, see www.uscerp.org.
